

# ISAGlue, ISAMoldable, RCF Coating Cement, and Rigidizer

Available from Insulation Specialties are specialty products for ceramic fiber.

**ISAGlue** is a high temperature refractory cement that is a very versatile material with uses ranging from bonding ceramic fiber shapes together to repairing cracks in refractories, along with countless other uses. Available in standard ceramic fiber, AZS, and high alumina formulations.

**RCF Coating Cement** has a temperature grade rating of 2300°F. The consistency of the cement coating makes it very versatile and provides a range of applications such as brushing, dipping, spraying, etc... The coating once dry possesses good adhesion to most materials, erosion resistance, thermal reflectance, and resists wetting on non-ferrous metals.

**ISAMoldable** is a putty-like consistency product that is applied by caulking, troweling, and/or by hand forming. Upon completion of drying the material possesses excellent green strength in addition to superior resistance to molten aluminum. Available in standard ceramic fiber, non-ceramic fiber, AZS, and high alumina formulations for higher temperatures up to 3000° F.

All four ISAMoldable products are available in:

- 11 ounce Caulk Tubes
- 1 Gallon Pails
- 4 Gallon Pails
- 5 gallon Pails

**Rigidizer** is an inorganic liquid hardener for use on ceramic fiber boards and shapes. Available in 1 gallon pails up to 55 gal drums.
